

Important Changes to Qantas International Checked Baggage Allowances

We're introducing a new international weight-based checked baggage policy.

This will allow for easier connections between Qantas and Emirates operated services between and within Europe, Asia, North Africa, the Middle East and Australia.*

The new policy has changed to a weight allowance, where there are no longer any restrictions on the number of bags allowed.

The baggage allowance on services to/from the Americas, the Australian Domestic network and some codeshare services~ are not changing.

The changes take effect for tickets issued from 26 February 2013 for travel on or after 31 March 2013.

Additional baggage rates have also changed.

*Subject to regulatory approval.
