

BE VERY AWARE OF THESE SCAMS - NEW TECHNOLOGY ,YOUR CAR,YOUR HOME

We all need to read this info very carefully. *Most examples are with the courtesy of experienced journalist Ian McIntosh.*

New technology like your phone or GPS makes it so easy for thieves to rip you off.

The premise here is that NOT ALL THIEVES ARE STUPID !!!!!

1. LONG - TERM PARKING Some people left their car in the long-term parking at the airport while away, and someone broke into the car. Using the information on the car's registration in the glove compartment, they drove the car to the people's home and robbed it. So I guess if we are going to leave the car in long-term parking, we should NOT leave the registration/insurance cards in it, nor your remote garage door opener. This gives us something to think about with all our new electronic technology.

2. GPS: Someone had their car broken into while they were at a football game. Their car was parked on the green which was adjacent to the football stadium and specially allotted to football fans. Things stolen from the car included a garage door remote control, some money and a GPS which had been prominently mounted on the dashboard. When the victims got home, they found that their house had been ransacked and just about everything worth anything had been stolen. The thieves had used the GPS to guide them to the house. They then used the garage remote control to open the garage door and gain entry to the house. The thieves knew the owners were at the football game, they knew what time the game was scheduled to finish and so they knew how much time they had to clean out the house. It would appear that they had brought a truck to empty the house of its contents. Something to consider if you have a GPS - don't put your home address in it. Put a nearby address (like a store or gas station) so you can still find your way home if you need to, but no one else would know where you live if your GPS were stolen.

3. MOBILE PHONES: I never thought of this! This lady has now changed her habit of how she lists her names on her cell phone after her handbag was stolen. Her handbag, which contained her cell phone, credit card, wallet, etc., was stolen. Twenty minutes later when she called her hubby, from a pay phone telling him what had happened, hubby says, "I received your text asking about our Pin number and I've replied a little while ago." When they rushed down to the bank, the bank staff told them all the money was already withdrawn. The thief had actually used the stolen cell phone to text "hubby" in the contact list and got hold of the pin number. Within 20 minutes he had withdrawn all the money from their bank account.

4. PURSE IN THE GROCERY CART SCAM: A lady went grocery-shopping at a local mall and left her purse sitting in the children's seat of the cart while she reached something off a shelf/ Wait till you read the WHOLE story! Her wallet was stolen, and she reported it to the store personnel. After returning home, she received a phone call from the Mall Security

To say that they had her wallet and that although there was no money in it, it did still hold her personal papers. She immediately went to pick up her wallet, only to be told by Mall Security that they had not called her. By the time she returned home again, her house had been broken into and burglarized. The thieves knew that by calling and saying they were Mall Security, they could lure her out of her house long enough for them to burglarize it. Moral lesson: A. Do not disclose the relationship between you and the people in your contact list. Avoid using names like Home, Honey, Hubby, Sweetheart, Dad, Mum, etc. B. And very importantly, when sensitive info is being asked through texts, CONFIRM by calling back. C. Also, when you're being texted by friends or family to meet them somewhere, be sure to call back to confirm that the message came from them. If you don't reach them, be very careful about going places to meet "family and friends" who text you.

5: BOOKING ONLINE TRAVEL : Think about this ! When you book travel online, a flight, hotel stay, carhire or advise another entity (online) that you are going to be away from Home. **Guess who gets to read your "away" periods!** The Supplier staff, the website managers, Internet data infiltration experts, other layers of web-savvy operators, etc. They also know other people. They may be honest and unrevealing or they may get paid referral \$\$ or know somebody who can visit your empty home or office while you are away ! Reduce your exposure of data as professional local bricks+mortar travel agents use their own encrypted CRS (Computer Reservation System) software to book flights, hotels, cars, insurances etc and are also required by law NOT to reveal your personal data . Risks are substantially reduced, if not totally annulled. Think about booking through a trusted, local bricks and mortar professional travel agent to reduce your exposure risks.

Compliments of
